

The complete demolition solution

**Demolish.  
Crush.  
Recycle.**

# Demolish. Crush. Recycle

**Hughes and Salvidge is one of the UK's leading decommissioning companies, established in 1964, with a reputation for Health and Safety, Quality and Innovation.**

Hughes and Salvidge is part of Hughes and Salvidge Holdings. Our group offering includes K&B Crushers, Aasvogel Waste Management and H&S Metals. Together we offer the complete solution: demolish, crush, recycle.

Hughes and Salvidge has a wealth of decommissioning and demolition experience gained through our many years of working across a broad range of sectors. Our valued client base includes chemical, petro-chemical

and pharmaceutical companies, heavy industrial and manufacturing organisations, developers and main contractors, local authorities and utility companies. We operate under an integrated management system that addresses all elements of health, safety, quality and environmental management. This system is audited by a UKAS approved audit organisation and is to BS EN ISO 9001, 14001 and 18001 standards.

Our client facing approach from initial budget costing through to final project completion ensures first class communication, client satisfaction and successful and safe project completion. Our on-going investment in the latest plant technology provides a safer, sustainable and more environmentally friendly service.

# Our Services Include:

## Decommissioning

Experts in the decommissioning of chemical, petro-chemical, pharmaceutical and heavy industrial sites.

## Demolition

All sizes of buildings and structures in any condition or state of contamination. Our experience includes traditional, mechanical and explosive techniques.

## Dismantling and Asset Recovery

Removal of redundant plant and equipment for potential re-sale through our database of buyers or relocation or disposal.

## Asbestos Removal

Specialising in the removal of all types of asbestos utilising the most up to date methods and equipment.

## Decontamination and Industrial Cleaning

Cleaning, removal and safe disposal of contamination from buildings, process plant, equipment and air handling systems.

## Land Remediation

Experience in the design and delivery of remediation techniques for the treatment of contaminated soils, groundwater, sediment, sludges and tars.

## Site Clearance

Excavation and processing of arisings, hard standings and substructures into a recyclable product for use on site or sale off site.

## Airport Projects

Specialist expertise in airport demolition, dismantling and strip-outs. We have been engaged in airport projects since the early 1990s.

# Safety, Health, Environment & Quality

## Safety and Health

Hughes and Salvidge recognises its statutory duty to comply with all safety and health legislation and strives to achieve the highest standards in all matters relating to the safety, health and welfare of employees and anybody else who is affected by our activities.

Our philosophy for the management of health and safety is simple – 'safety first'.

To ensure we complete projects safely and to the highest standards, we work to BS6187:2011 and place particular emphasis on training and keeping our techniques and working practices completely up to date.

All activities undertaken by Hughes and Salvidge are in accordance with the approved programme of work, phased operations and safe demolition techniques and activities are planned and undertaken in line with the Risk Assessments, Method Statements, Project Health and Safety Plan and Environmental Plan.

Continued project monitoring and progress evaluation is conducted throughout the duration of the project which ensures that we are providing the safest, most practical and cost effective solution for strategic decommissioning.

## Environment

Corporate social responsibility is high on our agenda at Hughes and Salvidge. Environmental protection is regarded as an integral part of our operation and it is considered by every member of staff. We carefully manage all our activities to reduce any potential environmental impacts to a practical minimum.

We strive to maximise the recycling potential on all project sites and aim to recycle in excess of 95% of demolition arisings. Hughes and Salvidge is committed to providing a sustainable service and we demonstrate this through the following:

- Culture - building a genuine culture of caring throughout the company and beyond.
- Community - having a social and economic impact at a local level.
- Safety - putting the health and safety of our workers, clients and anyone affected by our services first.
- Impact - constantly seeking to minimise the environmental impact of our work.

As an audited member of the National Federation of Demolition Contractors, our clients are assured of a well-managed, safe and environmentally considerate demolition project.

## Quality

Hughes and Salvidge values its customers and is committed to providing an exceptional service which complies with our stated policies, requirements and principles.

At Hughes and Salvidge customer satisfaction is paramount. We engage in meaningful partnerships with our clients allowing us to obtain excellent references and a record of delivering our projects safely, on time, within budget and to the client's full requirements.

Throughout our many years working in the demolition industry, we have developed an excellent reputation for producing high quality work and for managing projects safely with minimal disturbance to others.
